

PROFILE

I am Anish Ghimire and I am currently studying at Birendra Multiple Campus (BCA).

A lot of skills are required to be full stack developer and I am able to acquire some of them and they are languages like java, php, python, C#.

Although I have no experience with real world project work in a company, I have done projects for 4th and 6th semester, so I seek an internship opportunity to gain valuable skills and experience.
